

Backing up and restoring data

Please contact syst@inf.uni-konstanz.de if you need data to be restored. Don't forget to specify the precise path and date of the data you want restored.

In order to find out which versions of backup data are available, please proceed as follows:

```
ssh titan10.inf.uni-konstanz.de  
cd /net/backup  
/bin/ls -d bx*
```

Output e.g.:

```
bx1-27.03.2012    bx3-15.03.2012    bx2-26.03.2012    bx4-01.03.2012
```

For example, "bx1-27.03.2012" means that a backup is available from 27.3.2012.
