Transfer Funding Opportunities at the Zukunftskolleg

**Intersectoral Cooperation Program:** The program provides opportunities for junior researchers to work with industrial partners, companies, social institutions, cultural institutions, archives, public bodies, or non-profit organizations. The aim is to develop cooperation between postdoctoral researchers and the non-academic sector that fosters joint research projects with mutual benefits, research dissemination and public outreach initiatives.

**Interdisciplinary Collaborative Projects:** An interdisciplinary research project gives young researchers the opportunity to identify and explore new, innovative and/or risky research perspectives with neighboring disciplines and across disciplines. The grant should facilitate expert-intensive and inspiring research and offer recipients the chance to work together with colleagues from different disciplines, as well as to develop cross-cutting methods and topics.

---

**Exemplary projects within the Intersectoral Cooperation Program:**

*"From Development to Application: An Approach to Bridging the Difficulties of Translational Research" – cooperation between Jennifer Randerath (Psychology) and the Kliniken Schmieder*

*"The Study of Early Colonialism in the Pacific: Archaeology in Small Islands, History of Global Processes" – cooperation between María Cruz Berrocal (History and Sociology), and Dr. Beatriz Robledo Sanz (Head of the Department of Ethnology, Museo de América, Madrid)*

---

**Exemplary projects within Interdisciplinary Collaborations:**

*"Investigating the Major Photoprotection Mechanism of Diatoms with Ultrafast Transient Absorption Spectroscopy" – cooperation between Bernard Lepetit (Biology) and Daniele Brida (Physics)*

*"Statistical and Machine Learning in the Problems of Computational Chemistry" – cooperation between Oleksandra Kukharenko (Chemistry) and Lyudmila Grigoryeva (Mathematics and Statistics, Economics)*
